 [tasawur-abbas](#)

Flutter & Dart Developer with 3+ years of experience delivering 8+ cross-platform mobile apps for Android and iOS using Firebase, REST APIs, and MVC architecture, along with clean feature-based folder structure (core, features, shared) for scalable development across e-commerce, logistics, and wellness domains.

Experience

Flutter Developer

01/2022 – 03/2024

MicroProgramers Software Organization

On Site

Project: Tap A Deal

- Designed and expanded both mobile app and admin panel for a deals and discount platform connecting 1,000+ users with local businesses.
- Applied Firebase backend with Firestore, Authentication, and Cloud Functions to achieve 99% uptime and real-time data synchronization.
- Incorporated Google Maps for location-based deal discovery, improving user engagement by 30%.

Flutter Developer

03/2024 – Present

CODEFLICK

Remote

Project: Mastery

- Built a football training and e-commerce app for young players (ages 7-16) to master football skills through structured, drill-based videos and gamified learning.
- Executed full-cycle development including UI/UX design, REST API connectivity, Firebase integration, and app publishing.
- Applied features such as level-based video training modules, XP progression, trophy system, player profiles, and external Amazon shopping integration.
- Created reusable and testable widgets and screens within the mobile app to improve development efficiency.
- Provided a cross-platform solution with seamless performance across Android and iOS platforms.
- Applied Dart isolates for intensive processing, reducing app lag by 25% and improving performance.
- Participated actively in daily stand-up meetings, sprint reviews, and sprint planning sessions within an agile management framework.
- Ensured code quality through peer reviews and CI/CD pipelines.
- Took responsibility for publishing the application on the Google Play Store and Apple App Store.

Project: Aurylius

- Designed a daily discipline and focus app that helps users develop habits, set goals, and track progress efficiently.
- Built a responsive user interface supporting multiple screen sizes using LayoutBuilder, MediaQuery, and Flex widgets.
- Incorporated custom animations and transitions, enhancing retention rates by 22%.
- Integrated Marcus AI - a Stoic advisor chatbot - via REST APIs with GetX state management, enabling real-time streaming responses, reactive UI updates, and persistent conversation history across sessions.
- Ensured cross-platform performance and data synchronization across devices with Firebase backend integration.

- Applied clean, MVC structured architecture to ensure scalability and maintainability.

Project: NeuroNest

- Designed and developed a mindfulness and mental wellness app promoting relaxation and focus through guided exercises, music, and games.
- Built a calming, accessible UI using CustomPainter for guided breathing animations, Hero transitions for screen navigation, AnimatedContainer for mood-based theme shifts, and ScreenUtil for responsive layouts across all screen sizes.
- Delivered guided meditation flows, affirmation cards, and mindful breathing exercises with CustomPainter-drawn visual timers, alongside interactive mini-games (puzzles, quizzes, songs) using GetX for state management and SharedPreferences for user progress persistence.

Project: Fidelen

- Expanded a service marketplace app for verified service providers across Saudi Arabia, boosting service bookings by 15%.
- Enforced Firebase and REST APIs for live data and notifications.

Project: LineUpz

- Designed the complete UI for a barbershop booking app, enabling seamless appointment scheduling and payment through a clean, user-friendly design.
- Applied features like time slot management, secure online payments via Stripe and Apple Pay, and booking history tracking.
- Integrated Firebase and REST APIs for real-time data synchronization and notifications.

Flutter Developer

CoderGize

04/2025 – 06/2025

Remote

Project: Logi

- Designed and implemented a logistics and shipment management app with smooth UI and REST API integration for real-time shipment tracking and management.
- Integrated Google Maps for live shipment tracking, driver route visualization, and delivery status updates.
- Provided a seamless cross-platform experience optimized for Android and iOS.
- Applied advanced features including chat history export (PDF / Text).
- Enforced SOLID principles throughout the codebase with proper separation of concerns between data, domain, and presentation layers.

Project: Hooray

- Enhanced a school cafeteria app by resolving critical bugs and refining UI components, improving overall performance and user satisfaction scores by 35% across Android and iOS platforms.

Education

BSIT

GC University Faisalabad

10/2019 – 09/2023

Pakistan

- Completed a comprehensive four-year program focused on software development, data structures, algorithms, and software engineering principles.
- Acquired practical experience in Flutter and Android development through academic projects and a professional internship.

Skills

Frameworks and languages: Flutter, Dart, Java, Kotlin, GetX, REST API

Architecture: Feature-first (modular) architecture following MVC pattern and SOLID principles

Tools: Git, GitHub, Slack, Jira, Firebase (Firestore, Auth, Cloud Functions, Firebase Cloud Messaging (FCM)), VS Code, Android Studio, CI/CD

Systems: Android, iOS, Web

Storage: SharedPreferences, Get Storage, Hive

Publishing: Google Play Store, Apple App Store

Certificates

Coursera

Google Prompt Engineering (2025)

FreeCodeCamp

- State management and scalable Flutter architecture (2022)
- Debugging and performance optimization in Flutter apps (2022)
- Responsive UI development for Android & iOS & Web (2022)
